

We believe in Robot as a Service (RaaS). We believe that Robot must provide the services that is efficient and cost effective in sustainable ways. Understanding the financial challenges faced by the local restaurants in Singapore, our local design team designed the iServeBot-Poe® with subscription based operation in mind from scratch. This results in our unique worry-free subscription based business model and very attractive operating cost. Currently we are offering the following promotional subscription scheme for a limited period of time.

- **Subscription cost: S\$500 per robot per month with 24 months contract**
- **One time setup cost: S\$5000 per restaurant**
- **Free trial available for up to 3 months**

Price scheme for equipment purchase model of our iServeBot system is also available. Interested parties please contact us with your floor area size and height, and we will work out the proposal that suits your restaurants.
